SUMMARY

Netri Alia Rahmi (Alia) is a Data Science graduate from Airlangga University, honored as the Most Outstanding Student and Graduate, also recipient of the Highest Academic Action Points Award. She combines expertise in predictive modeling, data, and artificial intelligence with proficiency in Python, TensorFlow, and PyTorch to transform complex data into actionable insights and high-performing models. This capability is demonstrated through certification, portfolio of impactful professional projects and achievements in national and international data science competitions.

EDUCATION

Data Science Technology

Sep 2021 - Sep 2025

Airlangga University, Faculty of Advanced Technology and Multidiscipline

- GPA: 3.73/4.00 (152 credits)
- English Proficiency: [TOEFL-ITP 583 \(CEFR B2\)](#), [ELPT 550](#)

CERTIFICATION & SKILLS

SKILLS: Python, SQL, Microsoft Power BI, Tableau, Microsoft Excel, R, Google Cloud Platform, AWS, TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Statsmodels, Prophet, LangChain, Large Language Models, Function/Tool Calling, Git, PyCaret, SPSS, Minitab, Stata, BeautifulSoup, Scrapy, MLflow, Time Series Forecasting, NLP.

Problem-solving, Critical Thinking, Communication, Team Collaboration, Adaptability, Time Management, Leadership, Analytical Thinking, Initiative, Attention to Detail.

CERTIFICATION: [Professional Data Scientist \(Datacamp, 2024\)](#), [Professional Data Analyst \(Datacamp, 2024\)](#), [Data Analyst in PowerBI \(Datacamp, 2024\)](#), [Data Analyst in Tableau \(Datacamp, 2024\)](#), [SQL Associate \(Datacamp, 2024\)](#), [Data Engineer \(Datacamp, 2024\)](#), [SQL Advanced \(HackerRank, 2025\)](#), [Problem Solving \(HackerRank, 2025\)](#), [Python \(HackerRank, 2025\)](#)

PROFESSIONAL EXPERIENCES

HR Data & Analytics Intern, Kompas Cyber Media

Oct 2025-Now

- Automated employee communication workflows using Excel VBA macros, reducing message delivery time by 60% and improving reach to 50+ employees.
- Developed end-to-end AI powered candidate matching system using Gemini 2.5 API for resume screening, achieving 85% accuracy in candidate-job fit scoring based on HR competency indicators. Deployed via Streamlit with automated daily data sync from Kalibrr using Selenium Webdriver and Github Actions.
- Built real-time hiring tracker dashboard with Streamlit and Python, implementing Javascript based web scraping for Microsoft data integration, automated to refresh daily at 7:00 AM WIB via Github Actions.

Manager of Data & AI Product, PT Govnetic Solution Indonesia

Dec 2024-Sep 2025

- Develop LexHub legal-tech platform, architecting multi-database system using Pinecone VDB for vector embeddings, Google Cloud Storage for document files, Firestore for JSON Metadata, and Neo4j for graph relationships, successfully digitizing 57.043 regulations and 22.631 supreme courts with relationship map.
- Developed Lexia context analysis engine by benchmarking five NLI base architectures on a supervised Indo-Legal dataset, evaluating accuracy, F1-score and training time to select the optimal model, deployed the best performing architecture using transformers, achieving 92% accuracy and 89% F1-score in detecting regulatory contradictions.
- Built Lexport OCR pipeline leveraging GCP Vertex AI and python for automated document digitization, processing 500+ scanned legal documents from user with 95% accuracy and reducing manual data entry time by 80%.
- Engineered semantic legal search system utilizing FastAPI, IndoLegalBERT embeddings to query Pinecone VDB, conducting A/B testing between the baseline search and optimized pipeline with query caching and personalized vector indexing, resulting in 65% faster response in average response time for repeated queries and an 88% relevance score.

Data Analyst Intern, Ministry of Culture RI

Aug 2024-Dec 2024

- Conducted mixed-method analysis of qualitative and quantitative survey data from 30 households in Lembata, NTT using python (pandas, numpy) for data cleaning, transformation and joining datasets with SQL queries, identifying 8 key trends for local food sovereignty and cultural sustainability programs.
- Developed interactive Power BI dashboards with descriptive statistics and data visualizations using Matplotlib and Seaborn for Sidakerta platform, and fine-tuned Nvidia Llama 3.1 Nemotron 70B using LangChain for cultural insight generation, accelerating report generation by 20% and enabling real-time stakeholder queries through clear data storytelling.

- Formulated 10 evidence-based policy recommendations using Python for hypothesis testing and forecasting analysis to support "Makan Bergizi Gratis Pangan Lokal" initiative in NTT with projected 25% improvement in village food security metrics, and influencing allocation of Rp 10 million for cultural preservation programs through adaptability in presenting complex data insights

**Assistant Lecturer (Statistical Methods, Statistical Computation, Basic Database, NLP),
Airlangga University**

Jan 2024-Jul 2024

- Instructed 60 students in Statistical Computation and Statistical Methods using R programming and Python (pandas, NumPy, Matplotlib, Seaborn) for data wrangling, cleaning, transformation, and visualization; taught supervised learning (regression, classification) and unsupervised learning (clustering) techniques, achieving 9.02% improvement in average scores with 13 students scoring 90-100 on midterm.
- Delivered hands-on training in SQL database management, descriptive statistics, hypothesis testing (t-tests, ANOVA, chi-square), and A/B testing frameworks, connecting statistical analysis with business KPIs through problem-solving exercises, resulting in average practicum score of 83.45 with 85% of students applying skills in internships at Bank Indonesia.
- Created 15+ data storytelling tutorial materials demonstrating critical thinking in statistical concepts, fostering collaboration across student teams and building communication skills for presenting technical insights to non-technical audiences with attention to detail.

Business Data Scientist, Bukit Vista

Sep 2023-Dec 2023

- Developed time-series forecasting models using Python (Prophet, statsmodels ARIMA) and Jupyter Notebook with unsupervised learning techniques to predict rental demand patterns, achieving 87% forecast accuracy and informing dynamic pricing strategy that increased revenue per listing by average of 15%.
- Engineered automated customer service chatbot by fine-tuning Llama3 model and PyTorch on 10,000+ guest interaction records, successfully resolving 60% of common inquiries without human intervention.
- Performed exploratory data analysis on 200+ listing performance metrics using Python (pandas, NumPy) for data cleaning and transformation with SQL queries, establishing standardized feature-enhancement methodology through that drove 10% increase in booking conversion rates.
- Conducted backtesting and A/B testing using Python for hypothesis testing across 50+ properties over 3-month period, validating pricing model reliability and visualizing results in dashboards.

LEADERSHIP & COMMUNITY INVOLVEMENT

Co-Founder and Project Manager, IRIS

Aug 2023-Dec 2024

- Built a predictive stock market chatbot leveraging fundamental analysis and technical analysis using time series models with real time news and financial features, supporting forecasts for 10 Indonesian stocks.
- Led and delivered 9 data science projects end to end, from data exploration and feature engineering to validation and backtesting, while mentoring 600 plus multidisciplinary students in applied data scienc

HIGHLIGHTED AWARDS AND RECOGNITION

1. [3rd Winner Public Health International Competition \(PHIC\), Big Data Theme \(2024\)](#)
 2. [1st Winner Data Analytics Competition FindIT! UGM \(2024\)](#)
 3. [1st Place Playground Datathon by RISTEK UI \(2024\)](#)
 4. [3rd Winner Data Science Competition ICONIC IT Siliwangi University \(2024\)](#)
 5. [Most Favorite Project 24-hours Data Science Hackathon Bukit Vista \(2024\)](#)
 6. [3rd Winner Data Science Competition MCF ITB \(2024\)](#)
 7. [3rd Winner and Best Presentation Data Science Competition Gammafest IPB \(2024\)](#)
 8. [2nd Winner Machine Learning Competition Data Slayer IT Telkom \(2024\)](#)
 9. [The Best Metric Performance Satria Data, Big Data Challenge Division \(2023\)](#)
 10. [2nd Winner Statistics Enthusiastic Asia Student Paper Competition \(2022\)](#)
- +26 Others Awards and Recognition.
